Professional Summary

Final-year engineering student in Computer Science & Networks at ENSEIRB-MATMECA, with four years of work-study experience in banking and scientific research, an internship abroad and a co-founded company. Adaptable, team-oriented and passionate about software development. Seeking a full-time software engineering position in France starting September or October 2027.

Professional Experience

Software Engineering Apprentice - CEA (Commissariat à l'Énergie Atomique) (Sep 2024 - Sep 2027)

- Modernizing part of the control-command system for the Laser Megajoule
- Engineering role in high-stakes scientific infrastructure with strict reliability and quality requirements

Full-stack Developer Intern - Extramus, Terranova da Sibari, Italy (Jun 2026 - Aug 2026)

- Built a live HR platform managing Erasmus+ interns (recruitment, housing, attendance, payments) in a team of 4 developers
- Designed and delivered 6 modules (24,000+ lines of code) with PHP, MySQL and JavaScript
- Automated room allocation, prorated rent billing and Google Workspace account provisioning

Software Developer Apprentice - IT Department, La Banque Postale (Aug 2023 - Jul 2024)

- Worked in an agile team as a backend developer on internal PHP applications
- Participated in daily stand-ups, sprint reviews, and feature implementation

Data Mapping Intern - IT Department, La Banque Postale (Apr - Jun 2023)

- Designed and implemented a comprehensive system architecture map using Python

Tennis Coach - SPUC Tennis Club, Pessac (2019 - 2025)

- Taught youth (ages 6-18) and organized training sessions
- Volunteer involvement in club events and logistics

Entrepreneurship & Leadership

Co-founder & Partner - Xenalis (SARL) (Present)

- Shop and information platform for Pokémon products, focused on fighting scalping
- Also self-employed (micro-entrepreneur)

President & Co-founder - Chesseirb, ENSEIRB-MATMECA chess club

- Organizing events for students and running the club website

Education
